plusserver mogenius

# mogenius Kubernetes Manager

Your ingenious helper for
Day 2 Ops in Kubernetes

mogenius is a leading self-service platform for easily deploying applications in Kubernetes. Get even more secure operations and more efficient workflows for DevOps and developers thanks to blueprints and AI integration. Build and integrate CI/CD pipelines with ease, perform deployments, and resolve issues in no time.

### Use cases

+ Automation of deployment processes
+ Monitoring & troubleshooting for all teams, from beginners to Kubernetes experts
+ Cloud-native transformation and workload migration to Kubernetes

### Start quickly

The mogenius Operator can be installed in just a few minutes. It automatically connects your cluster to your mogenius account, and you can start creating workspaces right away.

### Get support

The mogenius team is happy to advise and support you with onboarding, containerization, automation, Infrastructure-as-Code, and more.

### mogenius at a glance

**plusserver**
Sovereign Cloud. Made & managed in Germany.

plusserver is the cloud provider with the digitalization platform „Made in Germany." We supportmedium-sized enterprises and large corporations step by step through their IT modernization. In addition to our cloud product portfolio based on our own certified German data centers, 24/7support in German or English, and comprehensive managed services, we are defined by our commitment to data sovereignty and interoperability. plusserver was the first company to productively implement an open-source cloud with „pluscloud open," which is based entirely on the Sovereign Cloud Stack and thus meets the highest data protection standards.
