- More than 3,200 business customers
- More than 4,000 successful projects
- 450 employees at 8 locations
- 10 data centers

plusseryer

Flexible hybrid cloud solutions

We offer our customers tailor-made hybrid cloud solutions for every cloud scenario. We advise customers on their choice of architecture and orchestrate all relevant infrastructures into an optimal hybrid cloud environment. To this end, we include dedicated infrastructures, public

and private cloud solutions and offers from hyperscalers. We are technology-independent and technically flexible. This enables us to implement the most efficient and secure solution for our customers at any time, including for our long-term customers.

Certified data security

- Certified data security according to international security standard ISO 27001 by TÜV SÜD
- Certified for secure credit card payment (PCI DSS)
- The information security management system (ISMS) is certified in accordance with ISO 27001

Partnerships

Together with our strong partners we realize highly available and stable solutions.
